Developmental Low Ropes Courses in Trees - March 2015

JM Adventure Ltd Developmental low ropes courses can be designed and shaped around the trees that you have available and can be tailored to suit your learning outcomes. This could be team building, individual challenge or a mix of both. Depending on the quality of the trees, the course can be designed to be completely tree based or have a mix of pole-based elements. The course can be built in phases depending on your budget, although it is often cheaper to complete it all in one go.

The elements can be installed as a linear run or as a loop, but both allowing a group to traverse the course and working as a team or as an individual challenge. Additionally, many of the elements work well as isolated elements.

Prices depend on the number and type of elements proposed but you can expect to pay between £13,000 to £15,000 (plus Vat) for a ten-element course. Prices are dependant on location, tree based connection and ground cover (UK mainland based courses and subject to site visit).

We would recommend a tree inspection be carried out by an experienced arboriculturist before a course is constructed as this will help confirm the safety of the course and avoid situations involving falling trees and limbs.

Developmental Low Ropes Courses in Trees - March 2015

In addition to the elements above we can also include the following isolated elements:

- Wild wozy
- Spiders web
- All aboard swing
- Trust fall platform
- Equilibrium challenge
- Criss cross
- Giants finger
- Peg pole wall and draw bridges
- Blind platforms

Dimensions:

- Height - Participants are no more than one metre from the ground at any time unless in a net
- Space required is dependant on the site and the trees
- Build Time is five days based on a ten element course
- Length of elements is dependant on the gaps between the trees but on a normal course most elements would not exceed ten metres.

Developmental Low Ropes Courses in Trees - March 2015

Additional costs for consideration:

- Ground cover (see below).
- Personal Protective Equipment.
- Accommodation and subsistence and mileage for the construction team.
- Flights, airport parking, connections and ferry costs (if applicable).
- Annual inspection costs
- Site specific training (see below)
- Planning applications
- Insurance

Ground Cover & Surrounds

We recommend using pea gravel because it has good drainage and does not mulch down or require topping up like bark and wood chips. If you would prefer bark chips or rubber matting please contact us for a quote.

Training

Staff will be trained, assessed and certified by Vertex Training Ltd, the UK's leading ropes course training company. Training will include operational procedures for the ropes course, correct use of PPE, access, inspections and rescues, challenge by choice and development skills. The duration of the training course will depend on the experience of the staff using the course. Training programmes accommodate up to ten members of staff to attend a site specific training course. The daily training rate is £400.00 (+ Vat) per day excluding mileage at £0.45 per mile and accommodation costs.

For more information or to book your training please feel free to contact Vertex. We strongly recommend that once you have a start date for your ropes project you book your training course. Call Vertex on 01929 480 920 or email enquiries@vertex-training.co.uk

Additional information

For further information on any JM Adventure ropes course please contact info@jmadventure.com or call 01929 475691.

Prices are correct as of March 2015, they are based on a UK installation and are subject to change without notice. All course sold subject to the standard JM Adventure terms and conditions available on our website www.jmadventure.com.
